

“Compassionate Community” *Public Health, Palliative Care Model*

Palliative Care

- Improving the quality of life for people (and their families) living with serious illness and approaching the end of life.
- Physical, psychosocial and spiritual symptom relief

Demand : Resources
95% : 5%

Workplaces, Schools, Faith, Community,
Government

“Collectivist Communities”

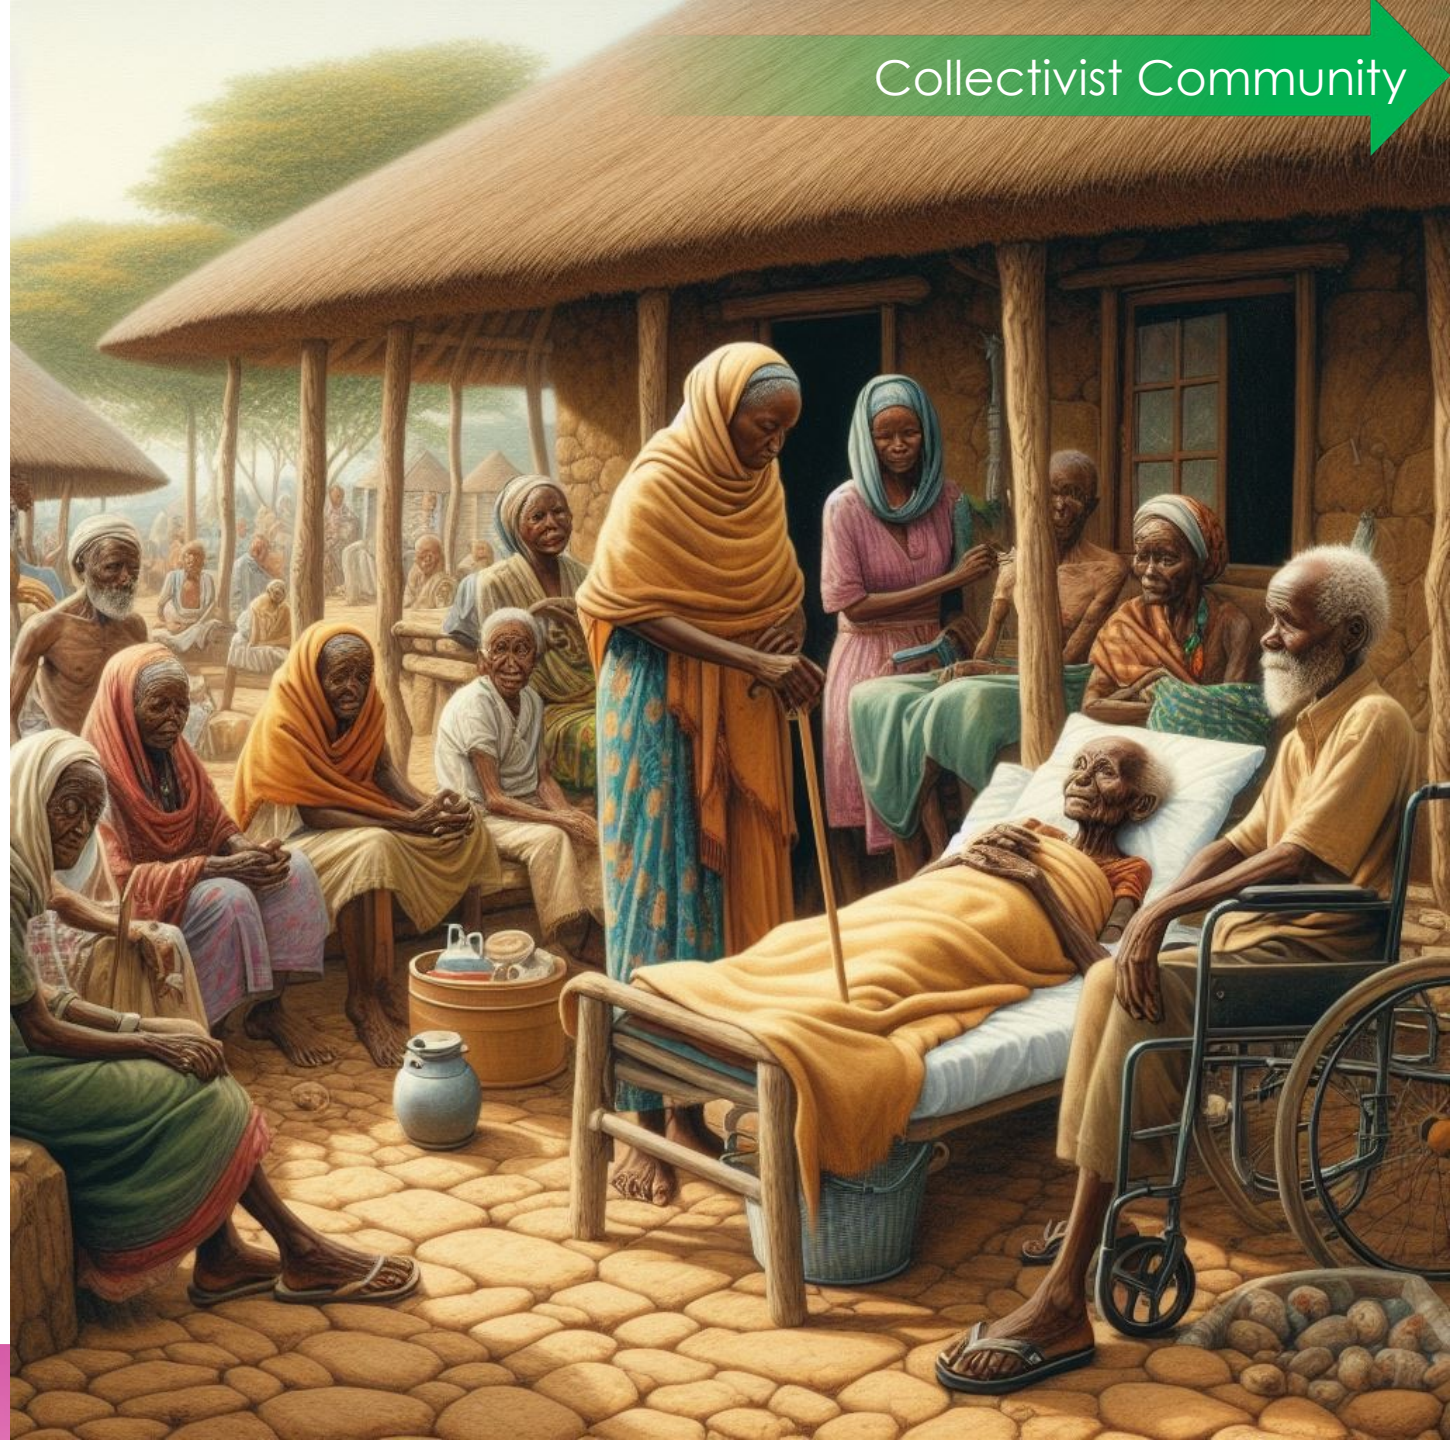

Emphasis on group over individual

- Interdependence
- Cooperation
- Family support
- Community involvement
- Shared resources
- Social norms that value helping one another

“We are because of each other”
