

David Johnson Collection of Science Fiction and Popular Culture
Finding Aid

Creator	Johnson, Dr. David S. 1945-2016
Title	David Johnson Collection of Science Fiction and Popular Culture
Dates	1927 – 2016
Abstract	Science fiction publications and popular culture magazines collected by Dr. David S. Johnson.
Extent	533 boxes, 190.3 linear feet
Language	English (with a few individual issues in Danish, Dutch, French, German, Greek, Italian, Norwegian, Portuguese, and Spanish)
Repository	Drew University Library, Madison NJ

Biographical Note

Dr. David S. Johnson (1945-2016) was renowned for his work in mathematics and computer science. His co-authored book *Computers and Intractability: A Guide to the Theory of NP-Completeness* is one of the most cited resources in all of computer science. For his contributions to theoretical and experimental analysis of algorithms, he received the 2010 Donald E. Knuth Prize, which is presented by the Association for Computing Machinery to an individual with great accomplishments and major contributions to the field of computer science. He worked at AT-T Bell Labs through the majority of his life, beginning as a member of technical staff and eventually becoming head of Mathematical Foundations of Computing Department in 1988 and, in 1996, head of the Algorithms - Optimization Research Department.

His contributions were not solely to the field of computer science itself, but also to those who study it. Johnson acted as visiting lecturer to Rutgers University and University of Wisconsin, and visiting professor to Columbia University. He also helped to develop The Center for Discrete Mathematics and Theoretical Computer Science (DIMACS) at Rutgers University and created Implementation Challenges, which are presented to challenge participants to look at an algorithm's performance in specific cases. This has led to plenty of new discoveries and information about the design and utilization of algorithms through the years.

David Johnson also loved to collect science fiction and popular magazines since childhood. His dedication to the preservation and enjoyment of this unique genre of literature is evident in the breadth of his collection.

Scope and Content Note

The David Johnson Collection of Science Fiction and Popular Culture contains science fiction publications and various popular magazines collected by Dr. David S. Johnson, encompassing materials from the late 1920s through 2016. Stories range from reprints of proto-science fiction/fantasy stories of Jules Verne and later H. G. Wells to modern giants including Isaac Asimov, George R.R. Martin, and L. Ron Hubbard. It also contains stories and reviews of television series and films such as *Star Trek* and *The X-Files* to name but two. Along with the plethora of science fiction magazines included there are popular magazines, most notably MAD Magazine, which uses satire and humor to highlight contemporary society.

Arrangement

The Johnson Collection is arranged alphabetically by title and chronologically within each title.

Titles with 5 or less issues in our collection are collected in a “Various Individual Issues” series separated by size (whether they fit in a pamphlet or magazine sized box) then titles are sorted alphabetically and, where there are multiple issues of a title, issues are chronological within their title.

There are various issues of MAD magazine that are not directly a part of the series of regular MAD magazine, such as MAD Specials, MAD in languages other than English, etc. Most of these issues are included chronologically within the rest of the regular MAD magazine series. Such issues which only indicate a year are placed at the end of the noted year. Others that do not include a date or do not reasonably fit into the rest of the MAD magazine series are included in a separate box at the end of the MAD magazine series called “MAD Magazine – Various Connected Items” and organized by title then chronologically within titles when needed.
